

A Data-Driven Assessment of Single-Use System Reliability: 2016-2018

A BPSA Benchmarking Report

Please note this report is available to BPSA Members only. To access a copy, you must complete a non-disclosure agreement. For further information, please contact bpsa@socma.org.

This report focuses on reliability of Single-Use Systems in five key product categories, using actual data collected and aggregated confidentially from five single-use system integrators.

With the report, End Users can quantitatively assess the risk of SUS to make comprehensive, manufacturing network business decisions.

Additionally, the report allows Suppliers to benchmark their own performance against industry averages.

Each can then target improvement initiatives toward complaint rate categories that align with their specific business or quality goals.

Through initiatives of this sort, BPSA's aim is to enable industry-wide improvements SUS reliability.
